Mohammed Osman

Hello Mr/Mrs:

I am Structural Design Engineer Who is passionate to make career shift toward Software development industry in Web development particularly.

I can implement python code within entry level effectively, generally or by using Django backend framework.

- to clarify the picture, my knowledge limitations as junior are:

- Creating crud operations

- Design and customizations of Django forms

- Authentication and login users

- Good Understanding of Django templates engine

- Users restrictions

- Django rest framework (basic)

I am junior in the field but I trust in my abilities and I am sure me will going to be so beneficial to your company.
